Response to Amendment

The reply filed on 6/18/07 is not fully responsive to the prior Office Action because: Previously submitter claims 119-142 are directed to an invention that is independent or distinct from the invention originally claimed as pointed out in the most recent office action. Applicant's submitted arguments do not remedy this matter. Applicant argues that the newly submitted claims have not changed the elected invention, but have merely clarified the needle configuration. The examiner disagrees. In applicants previously elected invention, no structural limitations for the needle were included. In fact, the structure of applicant's invention had been previously restricted out as a process and apparatus for its practice. Since the period for reply set forth in the prior Office action has expired, this application will become abandoned unless applicant corrects the deficiency and obtains an extension of time under 37 CFR 1.136(a).

The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. In no case may an applicant reply outside the SIX (6) MONTH statutory period or obtain an extension for more than FIVE (5) MONTHS beyond the date for reply set forth in an Office action. A fully responsive reply must be timely filed to avoid abandonment of this application.
